

My occupation as a sales manager for an Ag Equipment Co. requires that I drive 150 to 200 miles every day. Satellite radio is a very dependable source for weather and news information. You never travel outside the range of it broadcast. The programming allows for a wide variety of choices. Unlike many local analog channels that have a range of only 75 to 90 miles or less. I pay for this service and it should be upto me and the provider to decide what I listen to. NOT A BUNCH OF FAT CAT LOBBYIST AND THE POLITICIANS THAT ARE ABLE TO BUY.

I respectfully urge you to reject the NAB petition 04-160 and support XM's ability to provide me with the programs that I demand and deserve.
